

PROTECH 4035-CCE
COLD CURE EPOXY

Technical Data

DESCRIPTION: Protech 4035-CCE is a specially formulated heavy duty chemical resistant acrylated epoxy monolithic flooring surfacer designed for re-surfacing and patching both old and new concrete floors in environments below 50° F. where typical epoxy surfacers cannot be used. It has excellent adhesion to concrete, steel and wood. Protech 4035-CCE is many times stronger than concrete, which gives added protection against impact, abrasion and wear. This three component trowel applied system hardens quickly in cold environments to reduce downtime. It also creates a sanitary, non-shrinking, skid resistant surface.

RECOMMENDED USES: Cold storage warehouses, coolers, freezers, as well as areas where heavy traffic areas exist that are to be kept cold during installation.

CHEMICAL RESISTANCE: This surfacer is resistant to Lactic Acid, HCL, Phosphoric Acid, dilute Nitric Acid, Sodium Hydroxide, and Sulfuric Acid. It shows no degradation when exposed to chemical cleaners used in industrial cleaning and sanitizing regimen.

PHYSICAL CHARACTERISTICS: Compressive strength, ASTM C-579	9,000 - 10,000 psi
Tensile strength, ASTM C-307	1,400 - 2,200 psi
Flexural strength, ASTM D790:	4,000 - 5,000 psi
Flexural Modulus of Elasticity ASTM D-790	1.2 x 10 ⁶ psi
AbrasionResistance ASTM D-4060, CS-17 wheel	0.18 gm max.wt.loss
Coefficient of Expansion ASTM E-831	2.0 x 10 ⁵ in/in ° C

FINISH: Non-slip, non-skid

VOLUME SOLIDS: 100%

FLASH POINT: Part A: 217° F. Pensky Martens
Part B: 480° F. Seta Flash
Part C: Nonflammable

SUGGESTED THICKNESS: Nominal 1/4"

THEORETICAL COVERAGE: 16 sq. ft.* per batch at the recommended 1/4" thickness. *Material losses during mixing and application vary and must be taken into consideration when estimating job requirements.

COLORS: Brown, gray and red

PACKAGING: 1 unit = 3 batches
1 batch = 1 pint can (short filled) Part A, Activator
1 gallon can (short filled) Part B, Base
1 bag (30 lbs.) Part C, Aggregate

SHIPPING WEIGHT: 1 unit = 120 lbs.

FSIS APPROVED: Yes

All technical advice, recommendations and services are rendered by the Seller gratis. They are based on technical data which the Seller believes to be reliable, and are intended for use by Persons having skill and know-how, at their own discretion and risk. Seller assumes no responsibility for results obtained or damages incurred from their use by Buyer in whole or in part. Such recommendations, technical advice or services are not to be taken as a license to operate under or intended to suggest infringement of any existing patent.

PARKER COATINGS, INC. - 2451 W. MASON ST. - GREEN BAY, WI 54303
920-494-9676 800-236-9676

SURFACE PREPARATION: NEW CONCRETE must have a minimum of 28 days cure, and no curing agents shall be used. A good bonding tooth is necessary. To provide this tooth prepare concrete by sandblasting, scarifying, shot blasting or acid etching. OLD CONCRETE - remove all weak or powdery concrete. Make sure all wax, dirt, grease and other contaminants have been removed. All surfaces must be completely dry before application. METAL SURFACES should be cleaned by solvent degreasing, followed by abrasive blasting to near white metal SSPC-10-70 or NACE #2 with a 4 mil minimum anchor pattern tooth.

PRIMER: Parker Probond 65-LTP Consult with the Technical Department for your particular application.

CHASING EDGES: Whenever possible, cut or “key” the edges of the areas to be repaired approximately 1/2” deep with a masonry saw. Then trowel the mixture to a smooth transition to the adjoining floor. If the feathered edge method is used, taper the edges approximately 1-2 inches beyond the intended overlay area. For best results, seal the edges with Probond 65-LTP to insure a more positive bonding tooth to the surface being repaired.

MIXING: Empty the content of Part A into Part B, thoroughly stir for two minutes. Empty mixture into mixer pail or mortar box, draining can for about 1/2 minute. Start mixer slowly and add Part C. Mix for approximately three minutes.

POT LIFE: The working life of this mixture is 15-20 minutes. Pour mixed batches as soon as blended.

MATERIAL STORAGE NOTE: Materials should be stored at 40-50° F. for at least 24 hours before application.

APPLICATION: Pour the mixed batch onto the floor in a ribbon approximately 10” wide. Spread with a clean trowel, applying pressure to force the mortar into the floor surface. Finish each batch as you go. If the time lapse between batches is too long, the trowel may become sticky causing the mortar to pull, creating a porous surface. Keep the trowel clean by wiping with a cloth saturated with P34T Thinner.

CURE TIME: 24 hours light traffic -- 72 hours heavy traffic.

SEALING: When the ultimate in chemical and abrasion resistance is necessary or an easy to clean, sanitary surface is a must, Protech 4035-CCE can be sealed with clear A and B liquids. As soon as the surface is cured enough to walk on, use a clean trowel, squeegee or roller, and apply a liberal coat of Protech 4035-CCE liquids.

CLEAN UP: Protech 4035-CCE cured or hardened will stick to practically anything and is almost impossible to remove. Clean all tools and spills immediately with P34T Thinner or hot soapy water.

CAUTION: It is recommended that the personnel observe good personal hygiene. Certain personnel may be sensitive to various types of resins, which may cause dermatitis. Do not use in confined space or closed area without adequate ventilation. This product may be irritating to eyes and skin. Avoid contact with liquid components A and B and keep mortar from touching tool handles and clothes. Use coveralls, goggles, rubber gloves or protective cream. Always wash thoroughly with soap and warm water after use. Should accidental eye contact occur, wash thoroughly with water and consult a physician immediately. U.S. Department of Labor approved material data sheet is available.

LIMITED WARRANTY: The Manufacturer warrants this product to be free from defects in material and workmanship under normal use and service for a period of one year of the date of purchase. The Manufacturer’s sole liability shall be limited to replacing this product if, within one year of the date of purchase, it is shown to be defective. THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS OF PURPOSE. THE MANUFACTURER SHALL NOT BE LIABLE FOR INDIRECT, INCIDENTAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY KIND. This warranty shall not be extended, altered or varied except by a written instrument signed by the Manufacturer.
